

DATA SCIENCE STUDENT. LEARNER. MACHINE LEARNING ENTHUSIAST

SKILLS

- Calibre in collecting, wrangling and analysing data for trends and pattern and able to deploy the results.
- Strong in computer programming, coding and debugging.
- **Languages Known: Python, Qt using C++, SQL, R**

AREA OF INTEREST

- **Deep Learning, Machine Learning, NLP, Computer Vision, Artificial Intelligence**
- Statistics
- DBMS
- OOPS

EXPERIENCE

DATA SCIENCE DEVELOPER

Curneu MedTech Innovations

DEVELOPMENT OF NEUROSURGICAL SIMULATION | QT USING C++, VTK, AWS, DynamoDB

- The project “**Development of Neurosurgical Simulation**” aims to provide simulation environment for neurosurgeons to give hands-on experience in neuro surgeries with the patient real time DICOM data. The realistic-patient specific neurosurgical simulator is for training the medical resident, neurosurgical fellows and help them to perform the complex surgeries early in their career. Project link: [Neurosurgical simulator](#)

PROJECTS

MACHINE LEARNING APPROACH TO DETECT COGNITIVE STRESS IN HUMAN BEINGS | PYTHON

- This project provides an effective method for the detection of cognitive stress levels using data provided by Fitbit. This system used and evaluated real-time environment data collected from adults working in IT.

DATA ENCRYPTED CREDIT APPROVAL SYSTEM| DEEP LEARNING | PYTHON| FLASK |AES | PYTHONANYWHERE

- The aim of the project is to automate the credit approval system by building a secure model. The model performs with an accuracy of 95%. The application has been deployed in pythonanywhere.

MOVIE TICKET BOOKING SYSTEM | DBMS

- The aim of the project is to make the manual handling of movie ticket booking into a computerized system which includes both booking and cancellation.

PRESENTATION AND CERTIFICATIONS

Courses

- Python Programming and Qt using C++ in Udemy
- Artificial intelligence in MYCAPTAIN
- Data Base Management System in NPTEL
- Exploratory Data Analysis and Predictive Analytics in Data@ANZ Program

Presentation

- **Conference:** eiccn2020 (e-International Conference on Information, communication & Networking)
- **Topic:** Machine learning approach to detect cognitive stress in human being

Publications

- **Journal:** <https://www.ijariit.com/manuscript/e-commerce-data-analysis-to-find-online-shopping-trend/>
- **Topic:** E-commerce data analysis to find online shopping trends
